

## Darüşşafakalılar Derneđi Internet Project ↴

[www.darussafaka.org.tr](http://www.darussafaka.org.tr)

### Client: Darüşşafaka Alümnü

Darüşşafaka Alümnü, is the first alümnü found in Turkey (est. 1908) whose members are the graduates of the first school publicly found (est. 1873)

### Scope of the Project:

With this project it was targeted to increase the communication lines between the members, develop a document management system for the Alümnü and keep the members up to date of the activities benefiting from the Internet.

### Simternet Solution:

On its 100th anniversary, Darüşşafaka Alümnü planned several projects targeting to increase the awareness of its activities, enhance the communication lines between the members and keep the members up to date and increase their involvement in the Alümnü activities, making the best use of the advantages created by the Internet. As a common solution to all these projects MOSS 2007 was recommended and POC studies have been carried out for specific modules.

Using MOSS 2007 as a common solution platform helped to minimize the transition period with its ease of management and contuniuity with its well known Office screens.

In addition to [www.darussafaka.org.tr](http://www.darussafaka.org.tr) corporate portal, with [www.darussafaka.tv](http://www.darussafaka.tv) and the document management for the intranet, all the IT projects of the Darüşşafaka Alümnü were carried to MOSS 2007 environment, which enabled centralized management, enabling all the Alümnü activities to be carried out by a single operator. In order to summarize the results;

- Annual membership fees of 2500 members can be checked and necessary notices can be sent by the system. Members can also make their fee payments using the virtual pos on the website.
- By developing detailed profile pages for the members could execute detailed searches among fellow members (city, graduation year, occupation etc.)
- In addition to broadcast the important events of the Alümnü, these events have been archived and a visual history archive has been created. This helped members to review these records on demand.
- The Alümnü's 100 years old achives have been digitized which enabled a search to be executed within seconds.

### Conclusion:

Darüşşafaka Alümnü website is providing a perfect service and also is continuously developed under the database and the algorithm, developed by the Simternet engineers.

### Technology:

- Microsoft Office Sharepoint Server (MOSS) 2007
  - Advanced CMS
  - Work Flow Applications
  - Customized Services
  - Document Management
- Microsoft C#.Net
- Ajax.Net
- Microsoft Silverlight
- Microsoft. Net Framework 3.5
- Microsoft SQL Server 2008
- Windows Server 2008
