

Client: Dedeman Holding

With a foundation leaning back to 1900s, today constantly developing and growing within its own structure; Dedeman Group has considered Tourism and Mining as its primary branch of business and has continued its corporational and subsidiary activities on the areas such as construction, telecommunication with its 2.400 employee.

Scope of the Project:

To increase the total efficiency of the Dedeman Holding by means of servicing more than 3000 staff under one roof where everyone can easily search and access the document library files, business forms as well as training programs and manage their daily workflows online.

Simternet's Solution:

Simternet offered **Microsoft Office Sharepoint Server 2007** technology to answer Dedeman Holding's Corporate Extranet's actual and possible future requirements including integration with Dedeman Holding's existing infrastructure

Simternet developed workflows with a 3rd party tool (Nintex) and custom content management and document library webparts according to the customer requirements on the infrastructure of MOSS 2007

By the deployment of the project, Dedeman Holding staff has the following site map through their extranet webpage:

- Holding Announcements
- Legislations
- Corporate Standards
- Online Forms
- System Guides
- Newsletters
- Reports Center
- Document Library
- HR Process
- Meeting Room Reservation System
- Messages (Exchange integration)
- Outlook Calendar (Exchange integration)
- News
- And much more...

Technology:

- Microsoft Office Sharepoint Server (MOSS) 2007 Customizations
 - Enterprise Content Management
 - Workflows
 - Customizations
 - Document Library
- Microsoft C#.Net
- Ajax .Net
- Microsoft .Net Framework 3.5
- Microsoft SQL Server 2005
- Windows Server 2003
- Nintex Workflow 2007

Conclusion:

The architect design created by Simternet engineers for the extranet project is places in the heart of business management of Dedeman Holding. We keep on moving business critical applications of the holding to the extranet portal to increase the total efficiency and profitability
