

Client: Fortis Emeklilik

The company was found in 1997 with the aim of being active in life insurance sector, and was acquired by one of the leading finance groups of Europe: Fortis, on 21 November 2005 and continues its business under the name of Fortis Emeklilik ve Hayat A.Ş.

Scope of the Project:

Fortis Emeklilik Internet Branch Project focuses on providing all the information and the management tools that the policy holders would like to have on the web.

Simternet Solution:

Windows SharePoint Services 3.0 has been chosen for Fortis Emeklilik e-branch solution, to provide speedy answers to the managerial needs, to easily integrate to the existing Fortis IT systems and also to address the possible long term needs.

In line with Fortis Emeklilik's customer needs, Simternet carried out the design and developed the e-branch applications on the WSS infrastructure.

Some of the information and the features that Fortis Emeklilik customers can access from e-branch system are as follows:

- Contract details,
- Plan details,
- Payment details,
- Fund performance details,
- Statements,
- Account details,
- Payment receipts,
- Fund update options,
- Life insurance policies and payments,
- Collateral details,

Conclusion:

The site, providing a flawless service to thousands of Fortis Emeklilik customers with the database architecture and algorithm designed by the Simternet engineers, is further developed in line with the customer needs and requirements.
