

Client: BankPozitif

C Factoring A.S. and Israeli Hapoalim Bank joint venture forms Bank Pozitif Bank, a private bank in Turkey with more than 500 staff. The core business branch of the bank has been corporate banking beginning from our foundation and rendering services as a boutique bank.

Scope of the Project:

To increase the total efficiency of the Dedeman Holding by means of servicing more than 500 staff under one roof where everyone can easily search and access the document library files, business and manage their daily workflows online.

Simternet's Solution:

Simternet offered Microsoft Office Sharepoint Server 2007 technology to answer BankPozitif's Corporate Intranet's actual and possible future requirements including integration with BankPozitif's existing infrastructure

For the project, Simternet developed custom workflows according to the requirements gathered from the departments of the bank and also created and integrated a user rights management tool with the bank's existing security software. Simternet also customized the corporate content management and the document library modules.

By the deployment of the project, Dedeman Holding staff has the following site map through their extranet webpage:

- Announcements
- Legislations
- Corporate Standards
- Online Forms
- System Guides
- Products
- Campaigns
- Newsletters
- Reports Center
- Document Library
- HR Process
- Meeting Room Reservation System
- Messages (Exchange integration)
- Outlook Calendar (Exchange integration)
- News
- And much more...

Conclusion:

The architect design created by Simternet engineers for the intranet project serves hundreds of Bank Pozitif staff non-stop everyday. We keep on moving business critical applications of the bank to the intranet portal as requirements arise.
